Nebraska Business and Consumer Confidence Indexes: July 3, 2019

Prepared by the UNL College of Business, Bureau of Business Research

Author: Dr. Eric Thompson

Summary: Business confidence fell sharply in Nebraska during June 2019 and consumer confidence dropped modestly. The Consumer Confidence Index – Nebraska (CCI-N) fell to 104.4 in June, above the neutral value of 100 but below the May value of 105.3. The Business Confidence Index – Nebraska (BCI-N) fell to 100.3 in June, at the neutral level and down 13 percent from 113.2 in May. When asked about the most important issue facing their business, 35 percent of respondents chose customer demand while 21 mentioned the quality and availability of labor, 16 percent mentioned competition from other businesses and 9 percent flooding or weather. Fifty-three percent of responding households listed a cost factor as their top financial concern, including taxes, health care costs, the general cost of living and major expenses (furniture, appliances, automobiles). Notably, an elevated 16 percent of households listed taxes as their top concern. Twenty-three percent reported that their primary financial issue was either saving or paying off debt.

Consumer Confidence Index - Nebraska

The Consumer Confidence Index – Nebraska (CCI-N) summarizes responses to the monthly *Survey of Nebraska Households* regarding the household financial situation and the environment for a making a major household purchase. Respondents provide their assessment of both current conditions and expectations for the next 6 months. The *Survey of Nebraska Households* is sent to 500 households each month. The survey asks respondents whether: 1) their household is better off financially now than it was six months ago, 2) they expect their household to be better off financially in six months, 3) they believe now is a good time to make a major household purchase (automobile, appliance, or electronics) and 4) they expect it will be a good time to make a major household purchase 6 months in the future. The survey also asks a fifth question “What is the most important financial issue facing your household today?” Individual responses to that question fall into eleven categories. In June, responses were received from 126 of the 500 surveyed households, for a 25 percent response rate.

The Consumer Confidence Index – Nebraska is estimated based on responses to the first four questions. For each question, the share of respondents indicating that they are worse off (or that it is a bad time to make a major household purchase) is subtracted from the percentage who indicate they are better off (or that it is a good time to make a purchase). The number 100

is added to the difference in percentages. A value of 100, therefore, indicates that households are neutral, since a value of 100 would only arise if the same share of households declare that they are better off as declare that they are worse off. A value above 100 indicates positive consumer confidence. A value below 100 indicates negative consumer confidence.

The Consumer Confidence Index – Nebraska is the average of the values for the four questions. Therefore, a value over 100 for the CCI-N indicates positive consumer confidence.

As seen in Table 1, the Consumer Confidence Index – Nebraska had a value of 104.4 in June 2019. This value is above the neutral level of 100.0. The value of the index fell by 0.9 points from 105.3 during May 2019.

Table 1: Consumer Confidence Index – Nebraska June 2019

Consumer Confidence Index - Nebraska	
Month	Index Value
June 2019	104.4
May 2019	105.3
Change from Previous Month	-0.9

Figure 1 shows household responses to the question about the most important financial issue they face. The most common issues raised by June respondents were the general cost of living (18 percent) and taxes (16 percent). Overall, 53 percent of respondents chose some type of cost factor as their top issue, whether taxes, the general cost of living, the cost of health care and health care insurance (12 percent) or a major expense (home or vehicle repairs, a new home or college tuition) (7 percent). Twenty-three percent of respondents choose paying off debt (12 percent) or saving (11 percent) as their top issue. Eight percent of households choose their level of wages or income as their top concern.

Survey of Nebraska Business

The Business Confidence Index – Nebraska (BCI-N) summarizes responses to the monthly *Survey of Nebraska Business* regarding sales and employment. Respondents provide their assessment of both recent employment and sales growth and expectations for the next 6 months. The *Survey of Nebraska Business* is sent to 500 Nebraska business establishments each month. The survey asks respondents whether: 1) the dollar sales volume at their business was higher, lower, or about the same as it was over the previous 6 months 2) the dollar sales volume at their business will be higher, lower, or about the same over the next 6 months, 3) the total number of employees at their business increased, decreased or stayed the same over the last 6 months and 4) the total number of employees at their business will increase, decrease, or stay the same over the next 6 months. The survey also asks “What is the most important issue facing your business today?” Individual responses to that question fall into one dozen categories of business and public policy issues. Surveyed businesses are randomly selected from all industries, including agriculture. Businesses of all sizes are surveyed. In June, responses were received from 86 of the 500 surveyed businesses, for a 17 percent response rate.

The Business Confidence Index – Nebraska is estimated based on responses to the first four questions. For each question, the percentage of respondents who indicate that sales or employment decreased (or will decrease) is subtracted from the percentage who indicate that sales or employment increased (or will increase). The number 100 is added to the difference in percentages. A value of 100, therefore, indicates that businesses are neutral, since a value of 100 would only arise if the same percentage of businesses declare an increase as declare a decrease. A value above 100 indicates positive business confidence. A value below 100 indicates negative business confidence.

The Business Confidence Index – Nebraska is the average of the values for the four questions. Therefore, a value over 100 for the BCI-N indicates positive business confidence. Recent values for the Business Confidence Index – Nebraska are reported in Table 2.

Table 2: Business Confidence Index - Nebraska, June 2019

Business Confidence Index - Nebraska	
Month	Index Value
June 2019	100.3
May 2019	113.2
Change from Previous Month	-13.0

Source: Survey of Nebraska Business

As seen in Table 2, the Business Confidence Index – Nebraska fell during June 2019. The value was 113.2 in May 2019, but fell to 100.3 in June. The June value is at the neutral value of 100, indicating that business confidence is neutral in Nebraska.

Results in Figure 2 show the top issues of business owners and managers responding to the June survey. Eighty percent of responses were related to business operations issues such as customer demand, the cost of goods and services, labor availability and quality, or competition and the need to improve business practices. Customer demand was the most common top issue, named by 35 percent of respondents. Twenty-one percent of respondents mentioned the quality and availability of labor as their top issue while 16 percent focused on competition with other businesses. These percentages are all consistent with results from recent months. Ten percent of respondents focused on public policy issues, primarily taxes. During June, 9 percent of respondents choose flooding or weather as their top concern.
